Summary

Cloud Security Engineer with 3+ years securing multi-cloud environments across AWS and GCP. Experienced in IAM hardening, security automation tooling, and leading incident response. Comfortable operating as the security engineer embedded inside a fast-moving platform team.

Technical Skills

- **Cloud:** AWS (IAM, KMS, GuardDuty, Security Hub, VPC), GCP (IAM, Security Command Center)
- **Languages:** Python, Go, Bash
- **Security Tooling:** Terraform, OPA/Rego, Trivy, Falco, HashiCorp Vault
- **Practices:** Threat modeling, secure SDLC, SOC 2 / ISO 27001 controls, incident response

Experience

Cloud Security Engineer – Nebula Fintech

Jun 2023 – Present

- Rebuilt IAM policy structure across 40+ AWS accounts, cutting over-privileged roles by 65% and passing an external SOC 2 audit with zero access-control findings.
- Built an internal Python tool that scans Terraform plans pre-merge for security misconfigurations, blocking risky changes before they reach production.
- Led incident response for 3 security events in the past year, including containment, root-cause writeups, and cross-team remediation follow-through.
- Introduced container image scanning (Trivy) into CI/CD, reducing shipped critical CVEs to near zero.

Security Engineer – Orion Cloud Labs

Jul 2021 – May 2023

- Implemented centralized secrets management with HashiCorp Vault, replacing hardcoded credentials across 12 microservices.
- Ran quarterly threat modeling sessions for new services and tracked remediation of identified risks to closure.
- Partnered with SRE to build GuardDuty/Security Hub alerting pipelines with on-call escalation.

Education

B.Tech in Computer Science & Engineering

Genius Grove Institute of Technology | Graduated: 2021

Certifications

- AWS Certified Security – Specialty
- Certified Kubernetes Security Specialist (CKS)
