

Cameron White

Data Engineer | cameron.w.fake@example.com | (555) 010-6666

Professional Summary

Data Engineer with 5 years of experience designing and optimizing massive data pipelines and data warehouses. Specialized in batch and streaming data processing to empower business intelligence and machine learning teams. Proven ability to handle petabyte-scale datasets efficiently.

Professional Experience

Senior Data Engineer | AnalyticsPro (2020 - Present)

- Designed and implemented a modern data stack using Snowflake, dbt, and Apache Airflow, processing over 5TB of telemetry data daily.
- Developed real-time streaming pipelines using Apache Kafka and Spark Streaming to power live operational dashboards, reducing data latency from 24 hours to 5 seconds.
- Optimized complex data warehouse transformations, reducing compute costs in Snowflake by 30% through effective clustering and materialization strategies.

Data Analyst / Engineer | Retail Insights (2017 - 2020)

- Built ETL pipelines in Python to extract data from various SaaS APIs (Salesforce, Zendesk) into an Amazon Redshift data warehouse.
- Created comprehensive data validation checks to ensure data quality and integrity before it reached BI tools.

Education

B.S. Computer Science | University of Data (2013 - 2017)

Technical Skills

Languages: SQL, Python, Scala, Java

Data Tech: Snowflake, Amazon Redshift, Apache Spark, Apache Kafka

Orchestration: Apache Airflow, dbt (data build tool)

Cloud: AWS (S3, Glue, Athena), GCP (BigQuery)
