

Avery Chen

Senior iOS Developer | avery.chen.fake@example.com | (555) 010-7777

Professional Summary

Passionate Senior iOS Developer with 7 years of experience building polished, high-performance native applications for Apple platforms. Deeply invested in Swift, SwiftUI, and modern iOS architecture patterns. Strong focus on fluid animations, UI/UX details, and memory management.

Professional Experience

Senior iOS Engineer | MobileFirst Apps (2020 - Present)

- Led the development of a flagship fitness application entirely in SwiftUI, achieving a 4.9-star rating and over 2 million downloads on the App Store.
- Implemented complex offline-first data synchronization using Core Data and CloudKit.
- Architected the app using the MVVM-C (Model-View-ViewModel-Coordinator) pattern to ensure high testability and clean separation of concerns.
- Mentored junior iOS developers and established CI/CD pipelines using Fastlane and GitHub Actions to automate App Store deployments.

iOS Developer | Startup Innovations (2016 - 2020)

- Maintained and added new features to an existing Objective-C codebase before successfully migrating core modules to Swift.
- Integrated third-party REST APIs and handled complex asynchronous operations using GCD and Combine.

Education

B.S. Software Engineering | Coastal University (2012 - 2016)

Technical Skills

Languages: Swift, Objective-C

Frameworks: SwiftUI, UIKit, Combine, Core Data, CloudKit, XCTest

Tools: Xcode, Fastlane, CocoaPods, Swift Package Manager, Git

Concepts: MVVM, Clean Architecture, Memory Profiling (Instruments)
