

Skyler Brooks

Smart Contract / Web3 Developer | skyler.b.fake@example.com | (555) 010-0000

Professional Summary

Pioneering Web3 Developer with 3 years of experience writing secure smart contracts on Ethereum and building decentralized applications (dApps). Deep understanding of blockchain protocols, cryptography, and DeFi economics. Security-first mindset.

Professional Experience

Blockchain Engineer | DeFi Protocol Labs (2021 - Present)

- Developed and deployed complex DeFi smart contracts (AMM, staking, and yield farming) using Solidity, securing over \$100M in Total Value Locked (TVL).
- Conducted rigorous unit testing and property-based testing using Foundry, preventing critical vulnerabilities before mainnet launch.
- Built the frontend dApp using React, Ethers.js, and wagmi, providing a seamless user experience for wallet integration and transaction signing.
- Collaborated with external security auditors to resolve identified vulnerabilities and ensure contract safety.

Backend Developer | CryptoExchange Inc (2019 - 2021)

- Built wallet infrastructure in Node.js to securely process deposits and withdrawals for Bitcoin and Ethereum.
- Implemented robust rate-limiting and security protocols to prevent API abuse.

Education

B.S. Computer Science (Cryptography Focus) | Tech Institute (2015 - 2019)

Technical Skills

Web3: Solidity, Ethers.js, Web3.js, Hardhat, Foundry, IPFS, Smart Contract Security

Web2: JavaScript/TypeScript, React, Node.js, Python

Concepts: DeFi, NFTs, Cryptography, Blockchain Consensus Mechanisms
